MONTHLY WEATHER REVIEW

VOLUME 85

1957

U. S. DEPARTMENT OF COMMERCE · WEATHER BUREAU

450810—58

Smiths QC 983 A27 vol 85 1957

REGULAR MONTHLY WEATHER SURVEY

Charts I–III and VI–XVII in each issue of the Review, January to December, inclusive;
Charts IV and V, A and B, in each issue January–March and November–December, inclusive:

Chart I. A. Average Temperature at Surface. B. Departure of Average Temperature from the Normal.
Chart II. Total Precipitation.
Chart III. A. Departure of Precipitation from Normal. B. Percentage of Normal Precipitation.
Chart IV. Total Snowfall.
Chart V. A. Percentage of Normal Snowfall. B. Depth of Snow on Ground.
Chart VI. A. Percentage of Sky Cover Between Sunrise and Sunset. B. Percentage of Normal Sky Cover Between Sunrise and Sunset.
Chart VII. A. Percentage of Possible Sunshine. B. Percentage of Normal Sunshine.
Chart VIII. Average Daily Values of Solar Radiation and Percentage of Normal.
Chart IX. Tracks of Centers of Anticyclones at Sea Level.
Chart X. Tracks of Centers of Cyclones at Sea Level.
Chart XI. Average Sea Level Pressure and Surface Windroses. Departure of Average Pressure from Normal.
Chart XII. 850-mb. Surface. Average Height and Temperature, and Resultant Winds.
Chart XIII. 700-mb. Surface. Average Height and Temperature, and Resultant Winds.
Chart XIV. 500-mb. Surface. Average Height and Temperature, and Resultant Winds.
Chart XV. 300-mb. Surface. Average Height and Temperature, and Resultant Winds.
Chart XVI. 200-mb. Surface Average Height and Temperature and Resultant Winds.
Chart XVII. 100-mb. Surface, 0300 GMT. Average Height and Temperature, and Resultant Winds.

In addition to the Charts I–XVII the survey consists of two monthly articles:

1. A discussion of the month's weather, including an interpretation of Charts I–XVII in relation to mean circulation patterns of the Northern Hemisphere.
2. A discussion of an outstanding weather situation of the month, including an analysis and interpretation of the meteorological features shown by synoptic weather charts.

NOTICE

The Weather Bureau desires that the *Monthly Weather Review* shall be a medium of publication for contributions within the field, but such publication is not to be construed as official approval of the views expressed.

CORRECTIONS

Volume 85:

p. 26, table 1: The temperature of −55° F. listed for Boonville, N. Y., was not officially accepted.
p. 120: Legend to figure 1 should read "Relation between dry bulb temperature at 4:45 p. m. PST . . ." instead of "dewpoint temperature."
p. 248, fig. 4: Time of eye report from reconnaissance aircraft should be 1500 E (2000 Z) instead of 1500 Z.

NOTE: Corrected maps (so labeled) for Charts IX and X for July 1957 were printed in the August 1957 issue. They should replace the maps originally printed in the July issue.

SUBJECT AND AUTHOR INDEX OF THE MONTHLY WEATHER REVIEW, 1957, VOL. 85

A

Agricultural meteorology:
Soil temperatures as related to corn yield in central Iowa. (4 figs.) John A. Riley, Jr. 393–400.

Alabama:
A procedure for forecasting tornadoes in Alabama, Georgia, and South Carolina. (18 figs.) A. H. Stakely. 151–158.

ALLEN, CHARLES C.:
A simplified equation for minimum temperature prediction. (1 fig.) [Correspondence] 119–120.

An analysis of the movement of a hurricane off the east coast of the United States, October 12–14, 1947. (8 figs.) Conrad P. Mook, Eugene W. Hoover, and Robert A. Hoover. 243–250.

Analysis of the squally wave in the Atlantic, July 18–19, 1957. (3 figs.) [Weather notes] Ralph L. Higgs. 251–253.

Alaska:
Noctilucent clouds in Alaska, July 27–28, 1957. (1 fig.) [Weather notes] W. B. Lindley. 272, 281.
Rare waterspouts in Alaska. [Weather notes] Gordon D. Kilday. 281.

ANDREWS, JAMES F.:
The weather and circulation of April 1957—A stormy month over the United States characterized by two contrasting temperature regimes. (8 figs.) 124–131.

Antarctica:
World record low temperature. South Pole, May 11, 1957. [Weather notes] E. C. Flowers. 207.
World record low temperature, South Pole, September 17, 1957. [Weather notes] 326, 383.

Anticyclones:
The weather and circulation of January 1957—A month with a persistent block in the Gulf of Alaska. (9 figs.) Paul Stark. 19–27.
The weather and circulation of March 1957—A month with an extensive polar block and expanded circumpolar vortex. (12 figs.) Howard M. Frazier. 89–98.

Arizona:
A possible singularity in the January minimum temperature at Phoenix, Arizona. (1 fig.) Paul C. Kangieser. 42–44.

B

BADNER, JULIUS:
and Melvin A. Johnson. Relationship of tropopause and jet streams to rainfall in southeastern United States, February 4–9, 1957. (5 figs.) 62–68.

BAILEY, R. E.:
and R. M. Whiting. Some meteorological relationships in the prediction of tornadoes. (18 figs.) 141–150.

The balance equation. Part I of Numerical methods in weather prediction. Frederick G. Shuman. 329–332.

BALLENZWEIG, EMANUEL M.:
The weather and circulation of September 1957—Including a discussion of tropical storm activity. (9 figs.) 315–325.

BEDIENT, H. A.:
and G. P. Cressman. An experiment in automatic data processing. (3 figs.) 333–340.

BOHL, VERNON G.:
and Marshall F. Grace. Movement of an upper-air low over the western United States, October 16–24, 1957. (7 figs.) 350–356.

Break in the heat wave on the east coast, July 1957. (8 figs.) Abe Rosenbloom and Norman C. Thomas. 259–265.

BROWN, MERLE J.:
The Utah storm of April 22–23, 1957. (2 figs.) [Weather notes] 302, 326.

BURLEY, MARVIN W.:
and Earl M. Ritchie and Charles R. Gray. Winds of the upper troposphere and lower stratosphere over the United States. (8 figs.) 11–17.

C

CHAPMAN, W. T.:
and B. Dubofsky. Northeastward-moving lows over eastern United States, November 14–19, 1957. (6 figs.) 373–382.

Climatology:
Frequency of cold-wet climatic conditions in the United States. (15 figs.) Peveril Meigs and Fernand de Percin. 45–52.
Probabilities of one-inch snowfall thresholds for the United States. H. C. S. Thom. 269–271.
Some statistical aspects of cirrus cloud. (3 figs.) J. Clodman. 37–41.
Winds of the upper troposphere and lower stratosphere over the United States. (8 figs.) Marvin W. Burley, Earl M. Ritchie, and Charles R. Gray. 11–17.

CLODMAN, J.:
Some statistical aspects of cirrus cloud. (3 figs.) 37–41.

Clouds:
Noctilucent clouds in Alaska, July 27–28, 1957. (1 fig.) [Weather notes] W. B. Lindley. 272, 281.

Clouds—Continued
Post-frontal orographic mammatocumulus, Sackets Harbor, N. Y., July 5, 1957. [Weather notes] C. R. Embree. 383–384.
Some statistical aspects of cirrus cloud. (3 figs.) J. Clodman. 37–41.
Temperature and wind fields at the time of noctilucent clouds in Alaska, July 27–28, 1957. [Weather notes] S. Teweles. 281.
COCHRANE, C. W.:
The use of surface pressure and temperature observations in upper-air analysis. (23 figs.) 69–82.
COLE, ROBERT O.:
and Dale A. Lowry. Prefrontal rainfall over north central Texas, May 12–13, 1957. (10 figs.) 183–191.
Comments on "A possible singularity in the January minimum temperature at Phoenix, Arizona." Arnold Court. 303–304.
Comparison of monthly mean geostrophic and resultant wind speeds. (2 figs.) [Correspondence] William H. Klein. 364–366.
CONNER, W. C.:
and R. H. Kraft and D. Lee Harris. Empirical methods for forecasting the maximum storm tide due to hurricanes and other tropical storms. (1 fig.) 113–116.
COURT, ARNOLD:
Comments on "A possible singularity in the January minimum temperature at Phoenix, Arizona." 303–304.
CRESSMAN, G. P.:
and H. A. Bedient. An experiment in automatic data processing. (3 figs.) 333–340.
and William E. Hubert. A study of numerical forecasting errors. (15 figs.) 235–242.
CUNNIFF, CHARLES V.:
Relationship of normal incidence radiation to maximum visibility at Blue Hill Observatory. (5 figs.) 121–123.
Cyclogenesis and precipitation in the blizzard of March 21–26, 1957. (4 figs.) Henry R. McQueen and John F. Loopstra. 99–111.
Cyclones:
Cyclogenesis and precipitation in the blizzard of March 21–26, 1957. (4 figs.) Henry R. McQueen and John F. Loopstra. 99–111.
An early-season snowstorm along the Atlantic coast, December 4–5, 1957. (11 figs.) John B. Fuge and John M. Kipper, Jr. 417–422.
Movement of an upper-air low over the western United States, October 16–24, 1957 (7 figs.) Marshall F. Grace and Vernon G. Bohl. 350–356.
Northeastward-moving lows over eastern United States, November 14–19, 1957. (6 figs.) W. T. Chapman and B. Dubofsky. 373–382.
Cyclones—Continued
A storm over the Plateau, January 20–21, 1957. (9 figs.) Lewis C. Norton and Matthew H. Kulawiec. 28–36.
The Utah storm of April 22–23, 1957. (2 figs.) [Weather notes] Merle J. Brown. 302, 326.

D

de PERCIN, FERNAND:
and Peveril Meigs. Frequency of cold-wet climatic conditions in the United States. (15 figs.) 45–52.
Description of charts. 112, 268, 423.
Drought-relieving rains for Atlantic coastal States, August 23–26, 1957. (13 figs.) Clarence L. Kibler and Marvin R. Rogers. 288–295.
Drought:
Drought-relieving rains for Atlantic coastal States, August 23–26, 1957. (13 figs.) Clarence L. Kibler and Marvin R. Rogers. 288–295.
The 1957 drought in the eastern United States. (3 figs.) James K. McGuire and Wayne C. Palmer. 305–314.
The weather and circulation of July 1957—Drought in the East. (5 figs.) H. F. Hawkins, Jr. 254–258.
The weather and circulation of August 1957. (9 figs.) Raymond A. Green. 282–287.
DUBOFSKY, B.:
and W. T. Chapman. Northeastward-moving lows over eastern United States, November 14–19, 1957. (6 figs.) 373–382.
DUNN, CARLOS R.:
The weather and circulation of May 1957—A month with severe floods and devastating tornadoes in the southern Plains of the United States. (8 figs.) 175–182.
The weather and circulation of December 1957—High index and abnormal warmth. (11 figs.) 409–416.
Dust whirl on a quiet day, Syracuse, N. Y., March 28, 1957. [Weather notes] C. R. Embree. 88.

E

An early-season snowstorm along the Atlantic coast, December 4–5, 1957. (11 figs.) John B. Fuge and John M. Kipper, Jr. 417–422.
The eastern States heat wave of April 20–28, 1957. (6 figs.) Henry R. McQueen and Cadesman Pope, Jr. 132–139.
EMBREE, C. R.:
Dust whirl on a quiet day, Syracuse, N. Y., March 28, 1957. [Weather notes] 88.
Post-frontal orographic mammatocumulus, Sackets Harbor, N. Y., July 5, 1957. [Weather notes] 383–384.

Empirical methods for forecasting the maximum storm tide due to hurricanes and other tropical storms. (1 fig.) W. C. Conner, R. H. Kraft, and D. Lee Harris. 113–116.

Empirical relationships of the central pressures in hurricanes to the maximum surge and storm tide. (9 figs.) Robert A. Hoover. 167–174.

An experiment in automatic data processing. (3 figs.) H. A. Bedient and G. P. Cressman. 333–340.

F

Fire weather:
The relationship of weather factors to the rate of spread of the Robie Creek fire. (7 figs.) R. T. Small. 1–8.

Floods:
The weather and circulation of May 1957—A month with severe floods and devastating tornadoes in the southern Plains of the United States. (8 figs.) Carlos R. Dunn. 175–182.

FLOWERS, E. C.:
World record low temperature. South Pole, May 11, 1957. [Weather notes] 207.
and R. A. McCormick. World record low temperature, South Pole, September 17, 1957. [Weather notes] 383.

Forecasting:
Forecasting 700-mb. dewpoint depression by a 3-dimensional trajectory technique. (2 figs.) William Lewis. 297–301.
A procedure for forecasting tornadoes in Alabama, Georgia, and South Carolina. (18 figs.) A. H. Stakely. 151–158.
A simplified equation for minimum temperature prediction. (1 fig.) [Correspondence] Charles C. Allen. 119–120.
Some meteorological relationships in the prediction of tornadoes. (18 figs.) R. M. Whiting and R. E. Bailey. 141–150.
Sunspots and weather. H. W. Norton. 117–118.

Forest fires:
The relationship of weather factors to the rate of spread of the Robie Creek fire. (7 figs.) R. T. Small. 1–8.

FRAZIER, HOWARD M.:
The weather and circulation of March 1957—A month with an extensive polar block and expanded circumpolar vortex. (12 figs.) 89–98.
The weather and circulation of October 1957—A month with a record low zonal index for October in the Western Hemisphere. (9 figs.) 341–349.

Frequency of cold-wet climatic conditions in the United States. (15 figs.) Peveril Meigs and Fernand de Percin. 45–52.

FUGE, JOHN B.:
and John M. Kipper, Jr. An early-season snowstorm along the Atlantic coast, December 4–5, 1957. (11 figs.) 417–422.
